Summary

Front-end Developer with a year of experience building responsive, modular, and performance-oriented web applications. Skilled in JavaScript, React, Next.js, and modern UI engineering. Strong collaborator, fast learner, and passionate about clean code and user-centric development.

Experience

UI/UX Frontend Engineer — K.Dahal and Associates

- Designed and built the firm's client-facing website and portal from the ground up, filling a design gap typical for CA firms that usually outsource this work to external agencies.
- Translated advisory, audit, and tax service offerings into a clear, accessible UI, working independently as the firm's sole designer on the project.
- Coordinated directly with partners and staff to align the site's structure and content with the firm's branding and client communication needs.

Ghattekulo, Ktm
Apr 2025 – July 2026

Junior Frontend Engineer — InfoDevelopers Pvt. Ltd.

- Designed and implemented responsive UI/UX interfaces with Tailwind CSS and Figma-based prototypes, resulting in a more consistent design system across the application.
- Developed and maintained production-ready features using React and TypeScript, reducing component re-render issues and improving overall page load consistency.
- Collaborated with backend teams to integrate REST APIs and website designs, streamlining data flow and cutting average API integration time per feature.

Sanepa, Lalitpur
Aug 2025 – Mar 2026

Frontend Intern — InfoDevelopers Pvt. Ltd.

- Gained hands-on training in React, JavaScript/TypeScript, and responsive design, contributing to live project components within the first month while practicing Git workflows and Agile collaboration under mentorship.
- Transitioned focus toward UI/UX, applying design principles (layout, typography, accessibility, color theory) to real project components and improving visual consistency across assigned screens.
- Created a reusable component library (dropdowns, date pickers, tables, modals) with Tailwind CSS, cutting UI development time for new features.

Sanepa, Lalitpur
Feb 2025 – Aug 2025

Skills

Languages: JavaScript (ES6), TypeScript

Frontend: React.js, HTML, CSS, Tailwind CSS, Bootstrap, React Query

UI/UX: Figma, Prototyping, Visual Design, Layout Design, Typography, Responsive Design

Other: Agile Development

Education

B.Sc. (Hons) • Softwarica College of IT & E-commerce
• Bachelor of Science with Honours in Computing

Completed 2025

Projects

Estate Ease

- Real estate booking system designed to streamline property discovery and booking, reducing friction in the end-to-end user journey.
- Designed the complete Figma prototype and translated it into a functional interface built with JavaScript and React, integrating REST APIs for dynamic property listings and real-time data handling.
- Structured with semantic HTML and styled with CSS for a clean, accessible, and responsive interface.
